XL4 OCS

Datasheet for HE-XC1E0-22, HE-XC1E2-22, HE-XC1E3-22, HE-XC1E4-22, HE-XC1E5-22 HEXT251C100-22, HEXT251C112-22, HEXT251C113-22, HEXT251C114-22, HEXT251C115-22

1. Specifications

General Specifications	
Required Power (Steady state)	95mA @ 24 VDC (355mA with heater operating). 190mA @ 12 VDC (520mA with heater operating).
Required Power (Inrush)	2A for <1 ms @ 24 VDC DC Switched
Primary Power Range	10 – 30 VDC
Relative Humidity	5 to 95% Non-condensing
Clock Accuracy	+/- 20 ppm maximum at 25° C (+/- 1 min/month)
Operating Temp	-40°C to +60°C*
Storage Temp	-30°C to +70°C
Weight	12 oz. (340 g)
UL / CE	US Certifications Europe Certifications

Control & Logic Specifications		
Control Language Support	Advanced Ladder Logic Full IEC 1131-3 Languages	
Logic Program Size & Logic Scan Rate	1MB, maximum 0.013mS/K	
Online Programming Changes	Supported in Advanced Ladder	
I/O Support	Digital Inputs	2048
	Digital Outputs	2048
	Analog Inputs	512
	Analog Outputs	512
General Purpose Registers	50,000 (words) Retentive	
	16,384 (bits) Retentive	
	16,384 (bits) Non-retentive	

Display Specifications	
Display Type	3.5" TFT Transmissive Color
Resolution	QVGA (320x240)
Color	16-bit (65,535)
Screen Memory	27MB
User-Programmable Screens	1023
Backlight	LED – 50,000 hour life
Screen Update Rate	User Configurable within the scan time. (perceived as instantaneous in many cases)

Connectivity	
Serial Ports	1 RS232 & 1 RS485 on single Modular Jack
USB mini-B	USB 2.0 (480MHz) Programming & Data Access
USB A	USB 2.0 (480MHz) for USB FLASH Drives (2TB)
CAN	Remote I/O, Peer-to-Peer Comms, Cscape
Ethernet	10/100 Mb (Auto-MDX) Modbus TCP C/S, HTTP, FTP, SMTP, Cscape
Remote I/O	SmartRail, SmartStix, SmartBlock, SmartMod
Removable Memory	MicroSD, support for >32GB max. Application Updates, Datalogging, more

Input / Output Specifications

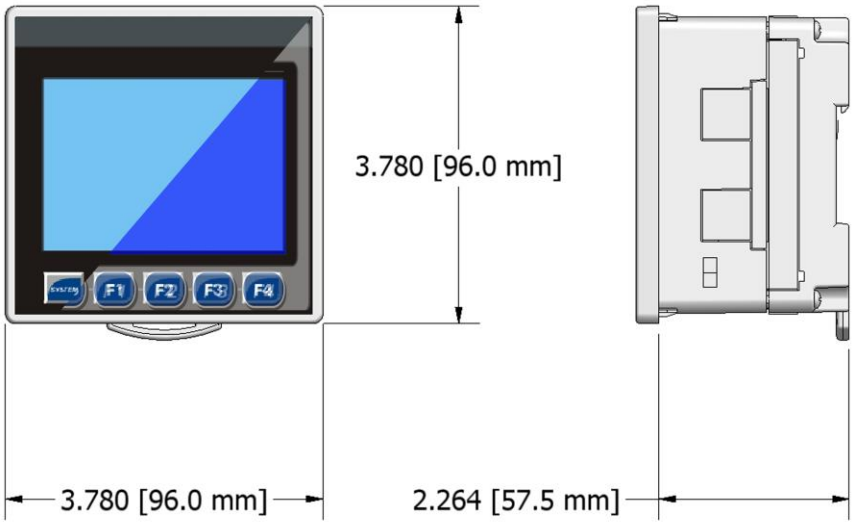
Model	DC In	DC Out	Relays	HS In	HS Out	mA/V In	mA/V RTD/Tc	mA/V Out
Model 2	12		6	4		4		
Model 3	12	12		4	2	2		
Model 4	24	16		4	2	2		
Model 5	12	12		4	2		2	2

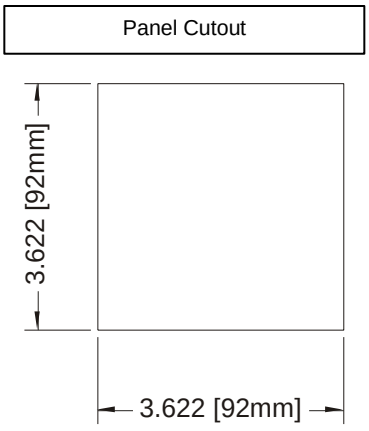
There are 2 high-speed inputs of the total DC Inputs. There are 2 high-speed outputs of the total DC outputs. Model 2, 3 & 4 feature 12-bit Analog I/O. Model 5 features 14/16-bit Analog I/O. High-speed Outputs can be used for PWM and Pulse Train Outputs, currently limited to <65kHz.

High-Speed Counters	
Number of Counters	2
Maximum Frequency	>500kHz each
Accumulator Size	32-bits each
Modes Supported	
Totalizer	Quadrature
Pulse Meas.	Frequency Meas.
2 Position Controlled Outputs 1 ON/OFF Setpoint per Output	

'* Power must remain on the unit below -10°C.

2. Dimensions & Panel Cutout





Cutout tolerance to meet NEMA standards is ±0.005" (0.1mm). Max. Panel Thickness is 5mm.

3. Installation Procedures

1. Carefully locate an appropriate place to mount the XL4. Be sure to leave enough room at the top of the unit for insertion and removal of the microSD™ card. Also leave enough room at the bottom for the insertion and removal of USB FLASH drives

2. Carefully cut the host panel per the diagram on Page 1, creating a 92mm x 92mm ±0.1mm opening into which the XL4 may be installed. If the opening is too large, water may leak into the enclosure, potentially damaging the XL4. If the opening is too small, the OCS may not fit through the hole without damage.

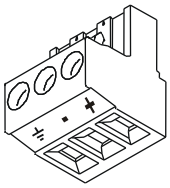
3. Remove all Removable Terminals from the XL4. Insert the XL4 through the panel cutout (from the front). The gasket needs to be between the host panel and the XL4.

4. Install and tighten the four mounting clips (provided in the box) until the gasket forms a tight seal (max torque 1.5Nm / 13.2Lb-in).

5. Reinstall the XL4 I/O Removable Terminal Blocks. Connect communications cables to the serial port, USB ports, Ethernet port, and CAN port as required.

4. Ports & Connectors

XL4 Connector Locations

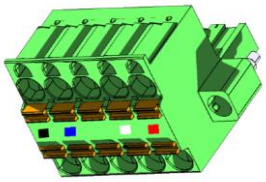


DC Input / Frame

Torque rating
4.5 – 7 Lb-In
(0.50 – 0.78 N-m)

DC- is internally connected to I/O V-, but is isolated from CAN V-
A Class 2 power supply must be used.

Primary Power Port Pins		
Pin	**Signal**	**Description**
1	Ground	Frame Ground
2	DC-	Input Power Supply Ground
3	DC+	Input Power Supply Voltage



CAN

Locking Spring-Clamp,
Two-terminators Per Conductor

Torque rating 4.5 Lb-In
(0.50 N-m)

SHLD and V+ pins are **not** internally connected to XL4

CAN1 Port Pin Assignments			
Pin	**Signal**	**Signal Description**	**Direction**
1	V-	CAN Ground - Black	-
2	CN_L	CAN Data Low - Blue	In/Out
3	SHLD	Shield Ground - None	-
4	CN_H	CAN Data High - White	In/Out

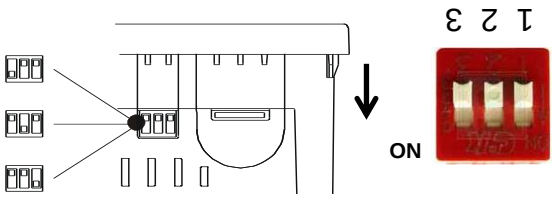
1	-	-	RX+ / TX+	IN / OUT

DIP Switches



Pin	Name	Function	Default
1	RS-485 Termination	ON = Terminated	OFF
2	Spare	Always Off	OFF
3	Factory Use	Always Off	OFF

5. Safety

WARNING: Only qualified electrical personnel familiar with the construction and operation of this equipment and the hazards involved should install, adjust, operate, or service this equipment. Read and understand this manual and other applicable manuals in their entirety before proceeding. Failure to observe this precaution could result in severe bodily injury or loss of life.
WARNING: To avoid the risk of electric shock or burns, always connect the earth ground before making any other connections.
WARNING: To reduce the risk of fire, electrical shock, or physical injury it is strongly recommended to fuse all Power Sources connected to the OCS. Be sure to locate fuses as close to the source as possible.
WARNING: Replace fuse with the same type and rating to provide protection against risk of fire and shock hazards.
WARNING: In the event of repeated failure, do not replace the fuse again as a repeated failure indicates a defective condition that will not clear by replacing the fuse.
WARNING: Battery may explode if mistreated. Do Not Recharge, Disassemble or Dispose Of in Fire.
WARNING: EXPLOSION HAZARD – BATTERIES MUST ONLY BE CHANGED IN AN AREA KNOWN TO BE NON-HAZARDOUS
Power input and output (I/O) wiring must be in accordance with Class I, Division 2 wiring methods of the National Electric Code, NFPA 70 for installations in the U.S., or as specified in Section 18-1J2 of the Canadian Electrical Code for installations within Canada and in accordance with the authority having jurisdiction. This equipment is suitable for use in Class I, Division 2, Groups A, B, C, and D or Non-hazardous locations only.
WARNING: EXPLOSION HAZARD – Do not disconnect equipment unless power has been switched off or the area is known to be non-hazardous.
WARNING: EXPLOSION HAZARD – Substitution of components may impair suitability for Class 1, Division 2. Digital outputs shall be supplied from the same source as the Operator Control Station. Jumpers on connector JP1 and others shall not be removed or replaced while the circuit is live unless the area is known to be free of ignitable concentrations of flammable gasses or vapors.

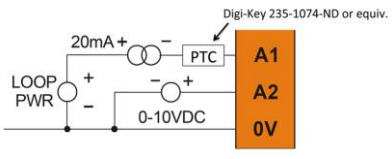
7. Common Cause of Analog Input Tranzorb Failure

A common cause of Analog Input Tranzorb Failure on Analog Inputs Model 2, 3, 4 & 5: If a 4-20mA circuit is initially wired with loop power, but without a load, the Analog input could see 24Vdc. This is higher than the rating of the tranzorb. This can be solved by NOT connecting loop power prior to load connection, or by installing a low-cost PTC in series between the load and Analog input. See SUP0977-01 for additional details.



NOTE†: Refers to Model 2 – orange *(pg.4)* Models 3 & 4 – J1 *(pg.5)* and Model 5 – 20mA Analog In *(pg.6.)*

8. Built-in I/O (Model 2, 3, 4 & 5)

All XL4 models (except the HE-XCE0) feature built-in I/O. The I/O is mapped into OCS Register space, in three separate areas – Digital/Analog I/O, High-Speed Counter I/O, and High-speed Output I/O. Digital/Analog I/O location is fixed starting at 1, but the High-speed Counter and High-speed Output references may be mapped to any open register location. For more details on using the High-Speed Counter and High-Speed Outputs, see the ***XL4 OCS User's Manual*** *(MAN0964)*.

Model 2 I/O

The XL4 model 2 (HE-XC1E2) features 12 DC Inputs, 6 Relay outputs, and 4 Analog Inputs. The DC Inputs are 12/24Vdc compatible, and can be jumpered for Positive Logic (sinking), or Negative Logic (sourcing). Four of the inputs (H1-H4) can be used for high-speed functions up to 500kHz. The 12-bit Analog Inputs can be jumpered for voltage (0-10V) or current (4-20mA) on a channel by channel basis. The Relay outputs are isolated, supporting AC and DC voltages, with output currents of up to 3A/relay, 5A total.

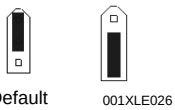
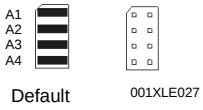
Model 2 Jumper Setting Details

JP1 Digital DC In / HSC

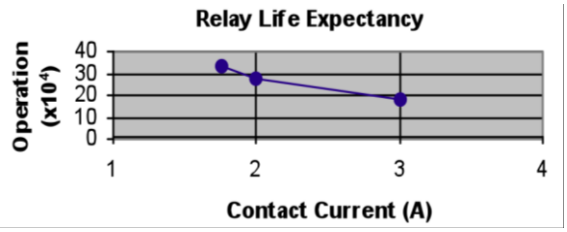


JP2 Analog In (A1 – A4)



Note: The Cscape Module Setup configuration must match the selected I/O (JP) jumper settings.

Note: When using JP2 (A1-A4), each channel can be independently configured.



"**WARNING**: EXPOSURE TO SOME CHEMICALS MAY DEGRADE THE SEALING PROPERTIES OF MATERIALS USED IN THE Tyco relay PCJ

Cover / case & base: Mitsubishi engineering Plastics Corp.
5010GN6-30 or 5010GN6-30 M8 (PBT)
Sealing Material: Kishimoto 4616-50K (I part epoxy resin)

It is recommended to periodically inspect the relay for any degradation of properties and replace if degradation is found

Model 3 & Model 4 I/O

The XL4 model 3 (HE-XC1E3) features 12 DC Inputs, 12 DC outputs, and 2 Analog Inputs. The XL4 model 4 (HE-XC1E4) increases the I/O count up to 24 DC Inputs, and 16 DC Outputs and 2 Analog Inputs. The DC Inputs are 12/24Vdc compatible, and can be jumpered for Positive Logic (sinking), or Negative Logic (sourcing). Four of the inputs (H1-H4) can be used for high-speed functions up to 500kHz. The 12-bit Analog Inputs can be jumpered for voltage (0-10V) or current (4-20mA) on a channel by channel basis. The 12/24VDC Outputs feature Electronic Short Circuit protection, and support currents up to 0.5A per point, and 4A total. Two of the DC Outputs can be used for high speed functions (PWM or PTO). The output frequency is limited by the switching capability of the output drivers (about 10kHz), although an optional accessory (HE-XHSQ) can be added to provide parallel output drivers supporting frequencies up to 200kHz.

Model 4 uses J1, J2, J3 & J4.

Model 5 I/O

The XL4 model 5 (HE-XC1E5) features 12 DC Inputs, 12 DC outputs, with high performance, highly configurable Analog Inputs (2) and Analog Outputs (2). , The DC Inputs are 12/24Vdc compatible, and can be jumpered for Positive Logic (sinking), or Negative Logic (sourcing). Four of the inputs (H1-H4) can be used for high-speed functions up to 500kHz. The 12/24VDC Outputs feature Electronic Short Circuit protection, and support currents up to 0.5A per point, and 4A total. Two of the DC Outputs can be used for high speed functions (PWM or PTO). The output frequency is limited by the switching capability of the output drivers (about 10kHz), although an optional accessory (HE-XHSQ) can be added to provide parallel output drivers supporting frequencies up to 200kHz.

The two high resolution Analog Inputs can be configured for 4-20mA, 0-10V, or 0-100mV at 14-bit resolution. They also can be configured for 16-bit temperature measurement – supporting Thermocouples or RTDs with 0.05°C resolution. The Analog Outputs are sourcing, and can be configured for 4-20mA or 0-10V at 14-bit resolution. Each Analog Input or Output channel can be configured independently for maximum flexibility.
